03-19 to 03-22 Crime Report.pdf

Community Partners; attached is the Central Patrol Division Crime Report for 03-19 to 03-22-10.

While conducting our home security surveys, we continue to observe a high percentage of homes that are not locking their windows or doors. Please take the time tonight to insure all windows and doors are locked prior to going to sleep or leaving your residence.

Many of our historic homes in Central Patrol Division have double hung windows. Below is a simple and inexpensive way to make those type of windows more secure.

The latches on

Securing Double-Hung Windows with Pins

many double hung windows can be easily jimmied or pried open. This type of window can be simply and inexpensively made secure.

The window can be pinned by drilling a hole at a slight downward angle where the upper and lower sash over lap each other in the center of the window. The hole should be drilled through the first sash and into, but not through the second sash. The window can then be pinned with a strong nail. Additional holes may be drilled for pinning the window in a slightly open

position for ventilation.
Several types of keyed slide locks can be utilized with vinyltype windows. Slide locks offer effective protection and are available for double hung windows. They are inexpensive and easy to install.

Master Patrol Officer James Schriever, CIO, Central Patrol Division, Office 816-759-6313, Cell 816-719-8350
